

## Product Information

### BCS-2 Web-Publisher

#### Product Description

The BCS-2 Web Publisher enables fast and user-friendly delivery of scanned documents. The documents are made available directly from BCS-2 on a web server in HTML format with a hyperlink. The hyperlink is sent to the user automatically in an e-mail. The user can then decide for himself when he wants to call up the document or copy it to his own system. The document can be displayed with a standard browser (Netscape Navigator or Microsoft Internet Explorer) by clicking on the hyperlink. The selected image appears in the main frame. The other images and the order data are shown as scrollable thumbnails to the left of the main frame.

#### Advantages

- User-friendly solution using standard web browsers for displaying documents.
- Lower overhead by reduced space requirements in mail in and out trays.
- Download with FTP binary connection faster than e-mail protocols.
- Avoids returned e-mails due to size restrictions on recipient's e-mail server.
- Documents available independently of the time and place of access to the scanner(s).
- Single storage of each document even when distributed to several recipients.

## Applications

- Document delivery services for books and periodicals (JASON, Medea-3, Subito, MyBib)
- Decentral Scanning at several locations, especially for industry and government with several sites and central archive or controlling.
- Publishing documents on the Internet or Intranet.
- Scan-on-demand in distributed archives

## Functions

The "WWW" function is an option in the order window of the familiar BCS-2 user interface. The entire document is converted to the previously defined format (TIFF, JPEG, PNG, etc.) and then embedded in HTML code. It is then stored on a definable web server using binary transmission (FTP). At the same time an e-mail with the hyperlink is generated by MAPI or SMTP to enable the customer to view the documents at any time.

## System Requirements

- BCS-2 Version 2.93

## Installation, Delivery

The web publisher is delivered as a module by e-mail and integrated in your BCS-2 with plug-in. The web publisher also includes the modules for FTP transfer, e-mail dispatch with MAPI/SMTP and the format conversion to browser compatible graphics formats.

## Scanners Supported

- Bookeye® DBS-2 GS, DBS-3 GS
- Fujitsu M3091, M3092, M3093, M3096, M3097, M3099
- Canon DR 3020, DR 3080C, DR 5020, DR 5080C, DR 4080U
- Microfiche scanners SCM-2, Canon MS 400, MS 500, MS 800
- Others on request
